EDUCATION

University of Wollongong - B.S., Computer Science

October 2022 – October 2025

Artificial Intelligence and Big Data

Coursework: *Advanced Programming, Database Systems, Modern Artificial Intelligence, Machine Learning & AI, Big Data Management, Big Data Mining Technologies.*

- **Distinction Grade:** Object-Oriented Programming (85/100), Advanced Programming (90/100), Modern Artificial Intelligence (90/100).

EXPERIENCE

Home Invease – AI Full Stack Developer

October 2024 – July 2025

Startup – University of Wollongong

- Developed full-featured application enabling users to track household items by scanning **objects and receipts**.
- Improved user query time and resolution by 30%, by an integrated Large Language Model (LLM).
- Optimized **database performance** by implementing ChromaDB, reducing item retrieval latency by 40%.
- Constructed **automated item recognition pipeline** for object detection, increasing scanning efficiency.
- *Tech Stack: Spring Boot, TypeScript, React, FastAPI, Firebase, TensorFlow, JWT, Tailwind CSS.*

PROJECTS

Link AI Assistant

[GitHub](#)

- Built a full-stack AI-powered solution delivered as both a **web application** and **Chrome extension**, enabling real-time interaction and seamless workflow integration.
- Integrated **Google Drive API with OAuth 2.0**, ensuring secure, real-time access, and user file management.
- Engineered an intelligent file analysis algorithm to **read, interpret, and classify documents**, generating **automated suggestions** for file renaming and folder reorganization.
- Improved **file management efficiency** by ~30% and reduced **manual organization time** by ~40%
- *Tech Stack: Express.js, Next.js, React, Chrome Extension APIs (Manifest V3), Google Cloud Platform.*

Loan Default Prediction Model

[GitHub](#)

- Built a predictive model for loan defaults using PySpark on a dataset of **850,000+ customer records**.
- Applied **data preprocessing, feature engineering, and imbalance handling** to improve model fairness and accuracy.
- Conducted **exploratory data analysis (EDA)** to identify top predictors and addressed severe class imbalance (~5.5% defaults) using under sampling.

SKILLS

- **Languages:** Java, C++, C#, Python, R, Git, SQL, PostgreSQL, MongoDB.
- **Frameworks & Tools:** React, Node.js, TypeScript, Spring Boot, Jira, MVC, FastAPI, RESTful APIs, Docker, OAuth2, JWT, Firebase, TensorFlow, PyTorch.
- **AI/ML Expertise:** NLP, Computer Vision, LLMs, Deep Learning.
- **Cloud & Big Data:** AWS, Google Cloud Platform, Hadoop, Spark, Snowflake.
